

Metric	3.3	3.3.4 Sexual and reproductive health care services for students	
Indicator		Provide students access to sexual and reproductive health-care services including information and education services.	
A/A	Level	Free Access (type of service)	Link (if available)
1		SEX Talk: open call to a participatory workshop for sexual health, organised by the CUT Student Development Center and Cy Checkpoint	https://www.cut.ac.cy/events/event/?contentid=510320
2		Workshop and recorded webinar: 'Youth: Healthy Relationships and Companionship', an annual partnership between the CUT School of Health Sciences, Student Welfare Centre and the Cyprus Family Planning Association to provide a platform for an open discussion around sexual and reproductive health, health and unhealthy relationships and provide information about available support resources and structures	https://www.cut.ac.cy/students/news-and-events/article/?languageId=100&contentId=551480
3		Baby Buddy webapp platform (www.babybuddy.com.cy), managed by the Dept Nursing and local NGO Birth Forward, co-created with all local scientific association in maternal-child health and other stakeholders, is free to register and continued through 2023 to have nationwide reach with 1000 new registrations annually across Cyprus, including the CUT student, administration & academic community, while the YouTube Channel with audiovisual material has global reach, providing day-to-day valid information, practical advice and emotional support during the 9 months of pregnancy and first 6 months of baby's life.	https://my.visme.co/v/z4prg4qy-emkm39v
4		FGM E-Campus online course. CUT Department of Nursing is a co-creator. Is free to register for HCPs, SCPs, students, administration & academic community), and has nationwide reach as it is translated into 5 languages.	https://endfgm-ecampus.eu/
5		The Cyprus University of Technology (CUT) became in 2023 the first public organization in Cyprus to have a properly designed and well equipped dedicated breastfeeding room, ahead of the Bill discussed at parliament which would make it a legal requirement for employers to provide support for breastfeeding women in the workplace. This initiative by the University has not only provided practical support to breastfeeding mothers within the University community but also, due to the strategic timing of the launch and the publicity given due to involvement of a well-known street artist who painted a mural on-site depicting a breastfeeding mother-child, it had an impact in raising awareness about breastfeeding as a basic reproductive health right of mother and child and as a responsibility of the employers to support and protect this right.	https://www.cut.ac.cy/news/article/?languageId=100&contentId=509780
